Post-Proceedings

Submission Instructions

Dear Authors,

Please see below the information and instructions regarding the submission of revised and extended manuscripts for the Post-Proceedings volume "Advances in Educational Technology".

Requirements for Submissions

It is supposed that the refined and extended version of a paper **differs substantially** from the paper published in the conference proceedings:

- At least by 30 percent
- Your revisions, improvements, and extensions SHOULD include new result(s)

The refinements and extensions are suggested in the following aspects:

- A new / revised approach that refines the published results is proposed
- New dataset(s) are used for experimental evaluation; the results are compared to the previous ones
- New evaluation experiment(s) are reported and their results discussed
- The proofs of the statements are included
- The description of the developed software is presented in a substantially more elaborated way
- New use case(s) are presented
- The review of the related work is extended and refined

It is also **requested** that the authors choose a **new title** for their new (revised and extended) paper. A reference to the previous article published in the conference proceedings must be placed in the extended version.

The page limit for a refined and extended version is **50** SCITEPRESS pages. We expect that your submission will have between **15-25** SCITEPRESS pages.

Important Dates

- Manuscript submission: May, the 30th, 2022
- Notification: June, the 21st, 2022
- Final submission: July, the 1st, 2022

All deadlines are **hard** and will **not be extended**. A failure to submit before a deadline will result in **automatic rejection** of your submission.

Review Criteria

The members of our Board of Reviewers will assess your submission using the following weighted criteria:

Criterion	Evaluation Aspects
Focus and Relevance	What is this submission about? What is the contribution? Is it in Educational Technology? Does the manuscript fit into the scope of AET?
Extension and Revision	Were the extension and revision sufficient (at least 30 percent)? Does the manuscript present a new result, compared to the conference paper?
Novelty	Are the presented results deemed as novel, compared to the State-of-Art?
Scientific / Technical Clarity and Correctness	Have the results been clearly presented and compared to the related work? Are the statements and claims correct?
Scientific / Technical Quality and Soundness	Have the results been sufficiently supported by valid arguments and/or proofs? Does the manuscript present valid evidence of experimental evaluation?
Presentation and Language	Is the manuscript properly and logically structured? Are any important elements missing? Are the figures and tables readable and properly illustrate the narration? Is the use of English proper?
Readership Interest	Is the paper potentially interesting and useful for a professional reader? Do you expect it will be cited?

Hence, your submission may be scored within the range of 0 – 10 based on the assessments per individual evaluation criteria.

The Components of Your Submission

There are TWO structural components in your manuscript:

- The SYNOPSIS of revisions and extensions
- The MANUSCRIPT

The SYNOPSIS is placed at the **beginning** of your submission file. The MANUSCRIPT **follows** the SYNOPSIS starting at a **new page** in the **SAME submission file**.

The SYNOPSIS is a **concise summary** of what has been added, refined, and extended in your manuscript, compared to the paper published in the conference proceedings. There is **no template** for SYNOPSIS it is written in a free form. Please make it a **short and clear summary**. Then clearer your synopsis is the less effort your reviewer will spend to find out if your submission is sufficiently refined and extended.

The MANUSCRIPT is your refined and extended paper formatted using two-column SCITEPRESS style (https://aet.easyscience.education/2021/example.zip). Therefore, for preparing your submission please STRICTLY FOLLOW the 'AET 2021 Authors' Instructions: Preparation of Camera-Ready Contributions to SCITEPRESS Proceedings' (https://aet.easyscience.education/2021/example.pdf) and use example.tex file from example.zip as template.

You are strongly suggested that the revisions, refinements, and extensions are colour-marked in the PDF of your MANUSCRIPT. Please use the following colour scheme for that:

- <mark style="background:cyan">Extensions</mark> – to mark the fragments that have been added
- <mark style="background:yellow">Revisions</mark> – to mark the fragments that have been revised / refined
- <mark style="background:lime">New result</mark> – to mark the fragments that present a new result

You can use any PDF editor to colorize your MANUSCRIPT – PDF editor PDFOffice to edit and create PDF from http://www.redcoolmedia.net/ (https://chrome.google.com/webstore/detail/pdf-editor-pdfoffice-to-e/mffappoadhfalhjgmfaoecjbdjfdfhdj?hl=en) is seems to be a good choice.

Submission Instructions

Submissions should be done via the **Symposium on Advances in Educational Technology (AET 2021) submissions site** at https://notso.easyscience.education/aet/2021/

You should have already received an email from the AET 2021 that your submission has been added to the system. However, only the old title and just old authors have been added. Hence, for submitting your manuscript correctly you have to perform several easy steps:

1. Enter the Advances in Educational Technology (AET 2021) submissions site via https://notso.easyscience.education/aet/2021/
   If you not registered at https://notso.easyscience.education/aet/2021/ you should to create an account using link https://notso.easyscience.education/aet/2021/newaccount Please enter your email at https://notso.easyscience.education/aet/2021/newaccount and click the 'Create account' button. The instructions for sign in would be sent to you.
2. After complete registration you should sign in and choose your paper at '**Your Submissions**'.
3. Open the '**Edit**' tab of your submission.
4. **Replace** your submission PDF and update information related to your paper. Here, please enter new **Title**, **Abstract**, **Authors**. Then click on '**Save and resubmit**' button in the bottom of '**Edit**' tab.

You may update your submission as many times as you find needed until the manuscript submission deadline. After this deadline, the system will NOT accept any updates.
